Who are we

Innovarum is a Spanish SME specialized in easing companies operating in the bio-economy access to European funding, in order to develop, scale-up and release to the market their innovative products, processes or services.

We are also an active Dissemination & Communication project partner, with successful experiences across various projects in the bioeconomy.

Our team is composed by agricultural engineers and PhDs with a wide background in Horizon 2020 projects submission and management as well as by business and marketing professionals.

Our experience (April 2020)

- 51** SME Instrument project submissions (31 Phases 1 and 20 Phases 2)
- 3** EIC Accelerator (previous SME Instrument Phase 2)
- 12** Collaborative projects (8 H2020, 4 BBI). Largest approved: 8.4M€ grant, 19 partners.
- 1** LIFE project with 5 partners
- 2** EMFF DEMO Project with 4 partners
- 4** Fast Track to Innovation with 4 partners

In addition: FIWARE, Activatte, CAPINFO...

Study on the participation of the Agricultural Sector in the BBI JU: [link](#).

Some successful projects*

Horizon 2020 and BBI-JU: 45% success rate in collaborative projects

GreenProtein. Funded under the Bio Based Industries 2015 call. It gathers 9 European partners, has a 5.5M€ budget and a 4.5 years duration. It obtained the highest possible mark: 15/15.

ValueWaste. H2020 project that gathers 17 partners and counts with a total budget of 10.8M€ for a 3-year work plan.

BioFruitNET. “Thematic network” (CSA project within H2020 related with the EIP Agri) funded in 2019 whose aim is to build a network for EU organic fruit farmers to foster key knowledge transfer. 16 partners, 3 years, coordinated by Naturland (DE).

W2W by RainMaker (NL). SME Instrument project dealing with the development of a mobile desalinization plant powered with renewable energies.
